

# PCEP Extensions for Associated Bidirectional SR Paths

*draft-ietf-pce-sr-bidir-path-02*

*Cheng Li (chengli13@huawei.com)*

*Mach(Guoyi) Chen (Mach.chen@huawei.com)*

*Weiqiang Cheng (chengweiqiang@chinamobile.com)*

*Rakesh Gandhi ([rgandhi@cisco.com](mailto:rgandhi@cisco.com)) - Presenter*

*Quan Xiong (xiong.quan@zte.com.cn)*

# Agenda

- Requirements and Scope
- Double-sided Associated Bidirectional **with Reverse** LSP
- PCEP Object Definitions
- Next Steps

# Requirements and Scope

## Requirements:

- Packet transport networks deploying bidirectional SR Paths
- Co-routed and non-co-routed forward and reverse SR Paths

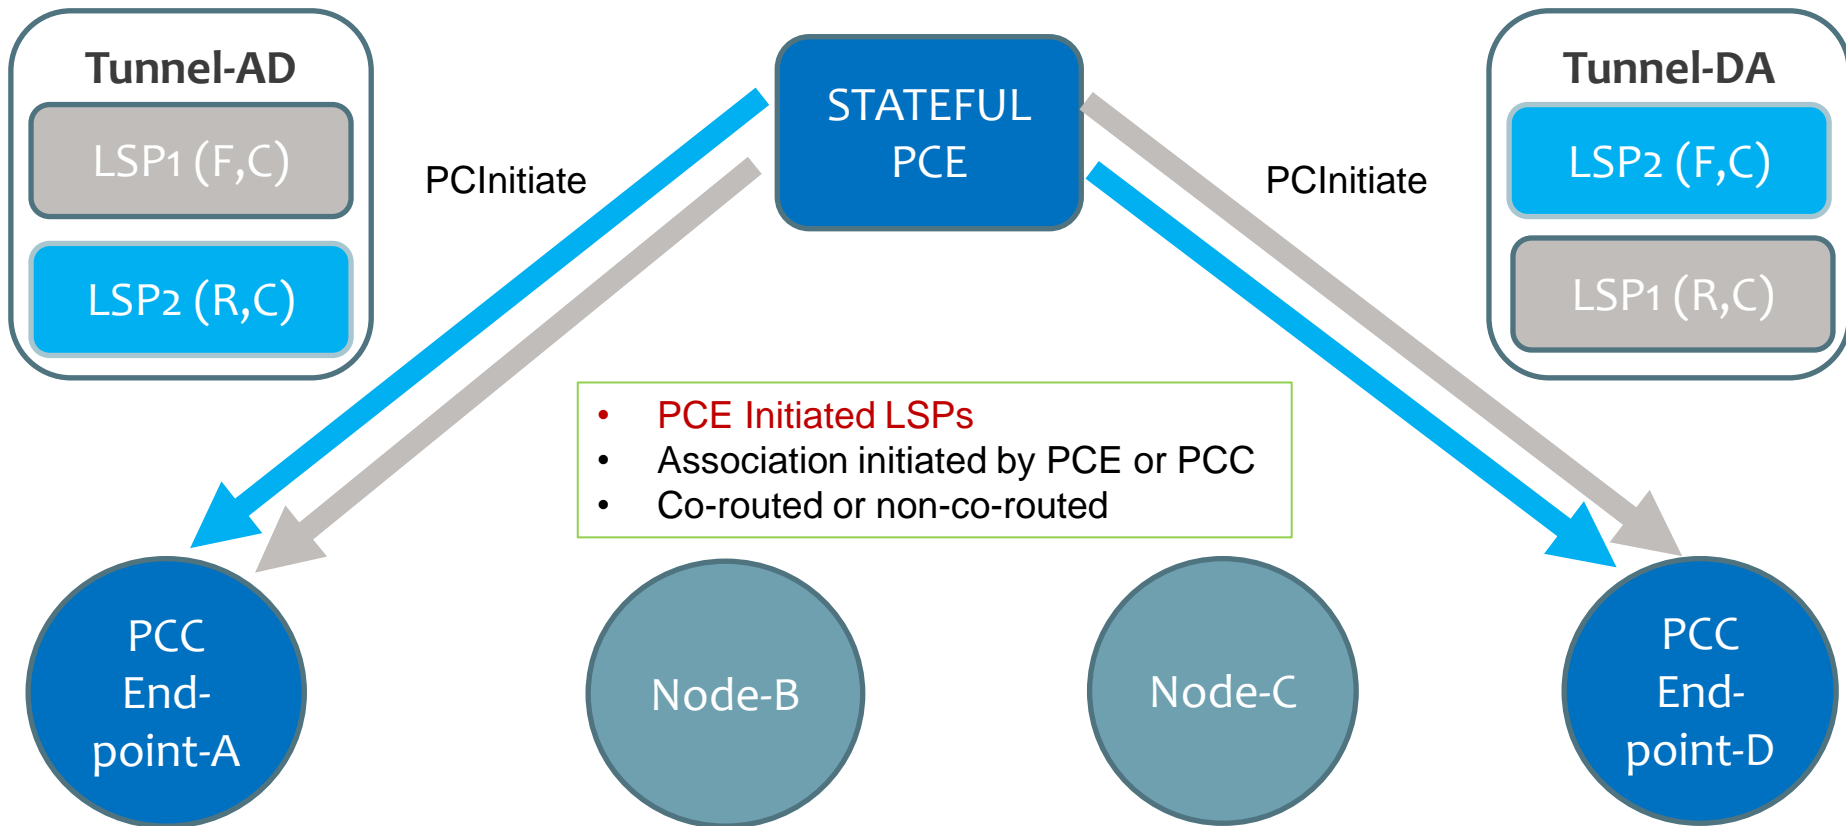

## Scope:

- Associated bidirectional SR Paths
- PCE-Initiated LSPs
- PCC-Initiated LSPs
- Stateless PCE (e.g. for co-routed path computation requests)

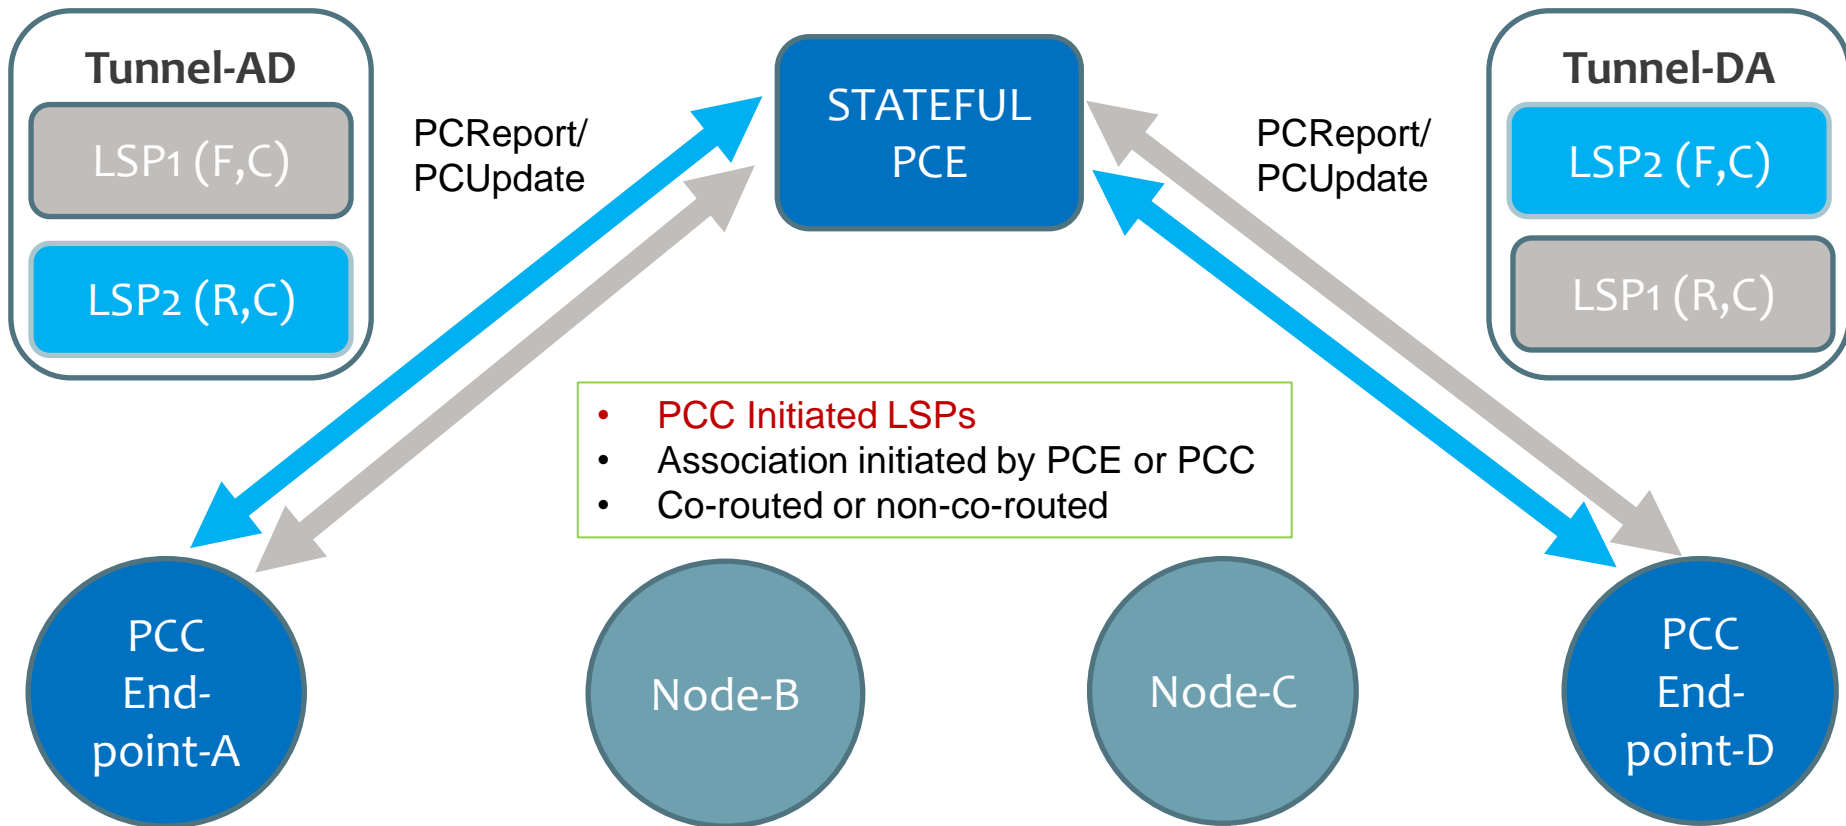

## Not in Scope:

- Associating bidirectional SR Path with RSVP LSP

# Double-sided Associated Bidirectional with Reverse LSP

# Double-sided Associated Bidirectional with Reverse LSP

# PCEP Association Object

- Association Type (TBD1) = Double-sided Bidirectional **with Reverse** LSP Association Group
- The Association Object Populated using the procedure defined in [*draft-ietf-pce-association-bidir*]

# Error Handling (PCErr Error-Type 26 - Association Error)

- PCErr defined in [*draft-ietf-pce-association-bidir*] are applicable

## **Specifically –**

- If a PCEP speaker receives a different Path Setup Type (PST) value for Bidirectional LSP association group and it does not support.
  - Error-Value = Bidirectional LSP Association - Path Setup Type Not Supported

# Next Steps

- Welcome your review comments and suggestions
- Queue for WG LC?

Thank you.

# PCEP Extensions for Associated Bidirectional Label Switched Paths (LSPs) with Stateful PCE

*draft-ietf-pce-association-bidir-06*

*Rakesh Gandhi (rgandhi@cisco.com)*

*Colby Barth (cbarth@juniper.net)*

*Bin Wen (Bin\_Wen@comcast.com)*

# Agenda

- Requirements and Scope
- Double-sided Associated Bidirectional LSP
- Single-sided Associated Bidirectional LSP
- PCEP Object Definitions
- Next Steps

# Requirements and Scope

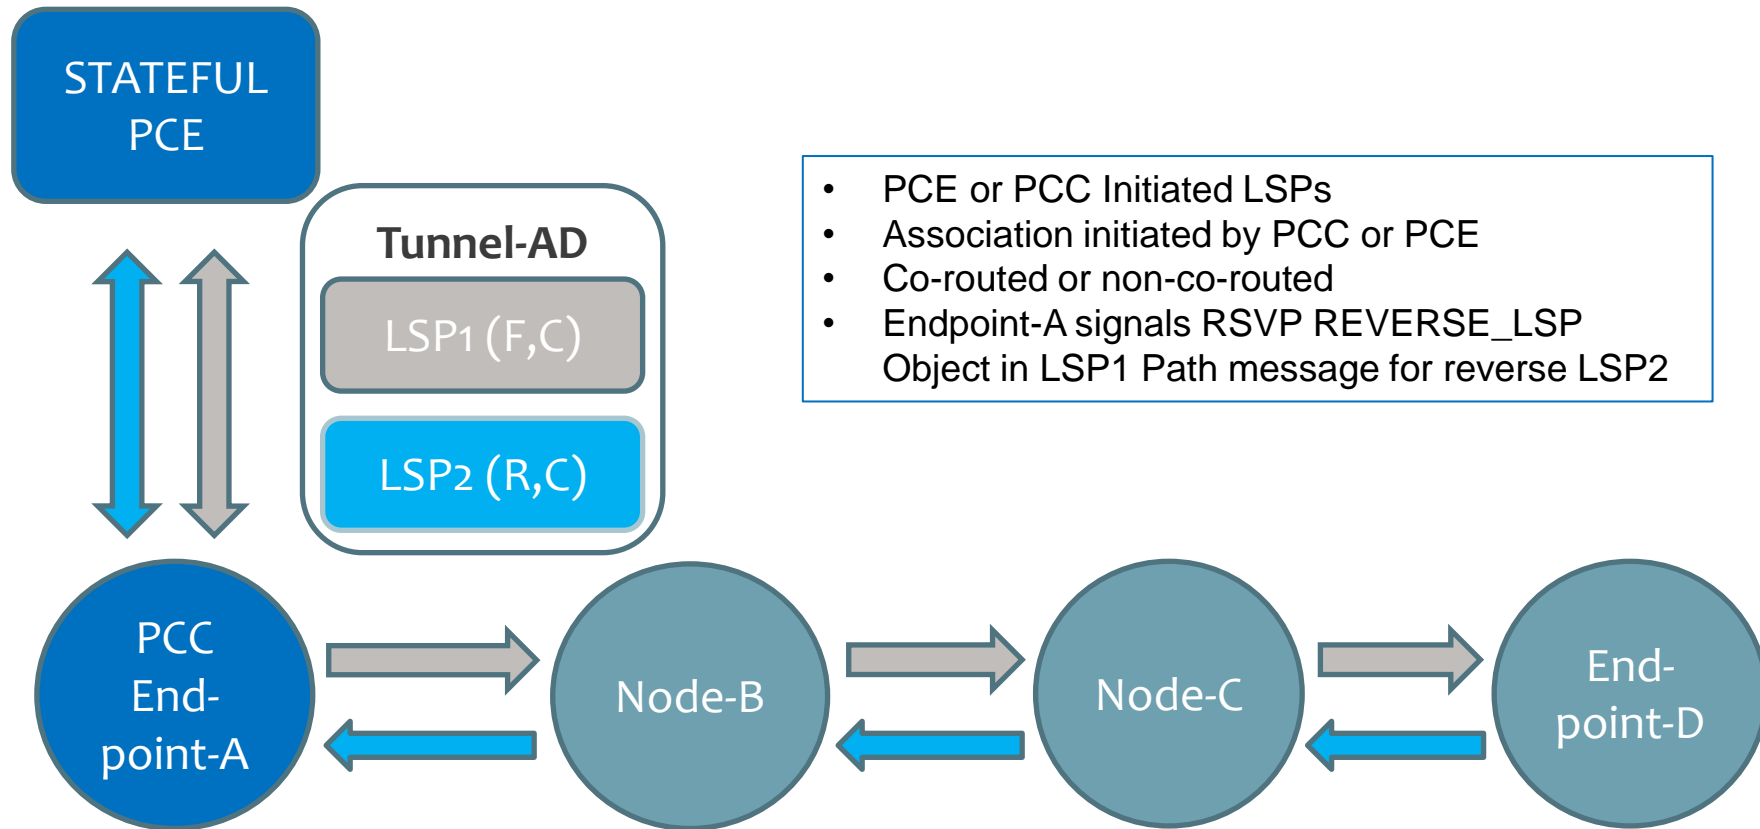

## Requirements:

- Packet transport networks deploying bidirectional RSVP LSPs
- Co-routed and non-co-routed forward and reverse RSVP LSPs

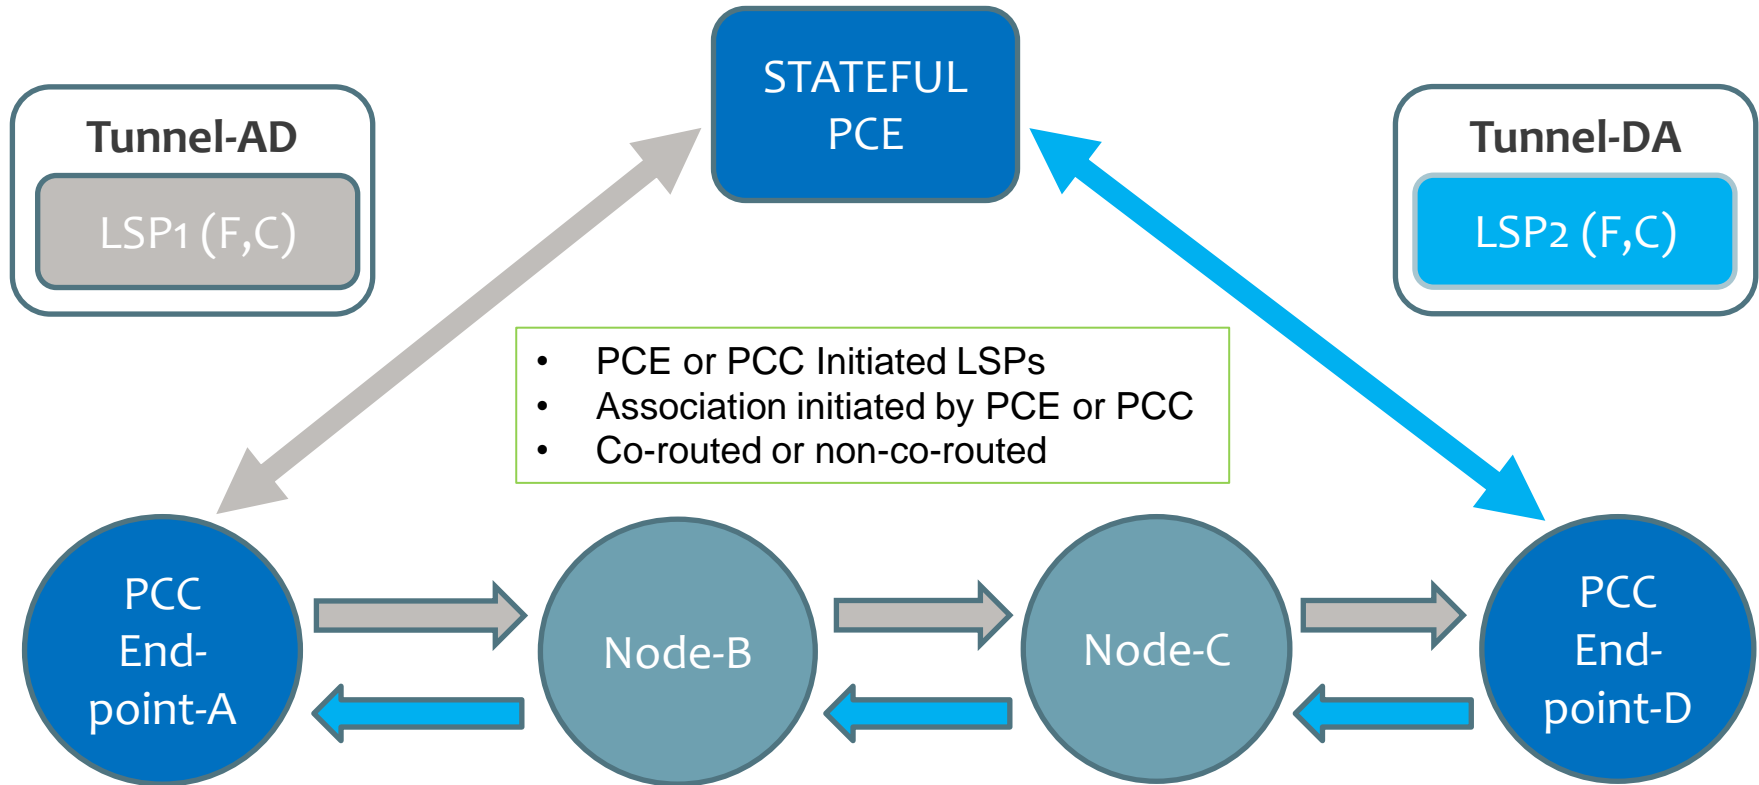

## Scope:

- Associated bidirectional RSVP LSPs
- PCE-Initiated LSPs
- PCC-Initiated LSPs
- Stateless PCE (e.g. for co-routed path computation requests)

# Single-sided Associated Bidirectional LSP

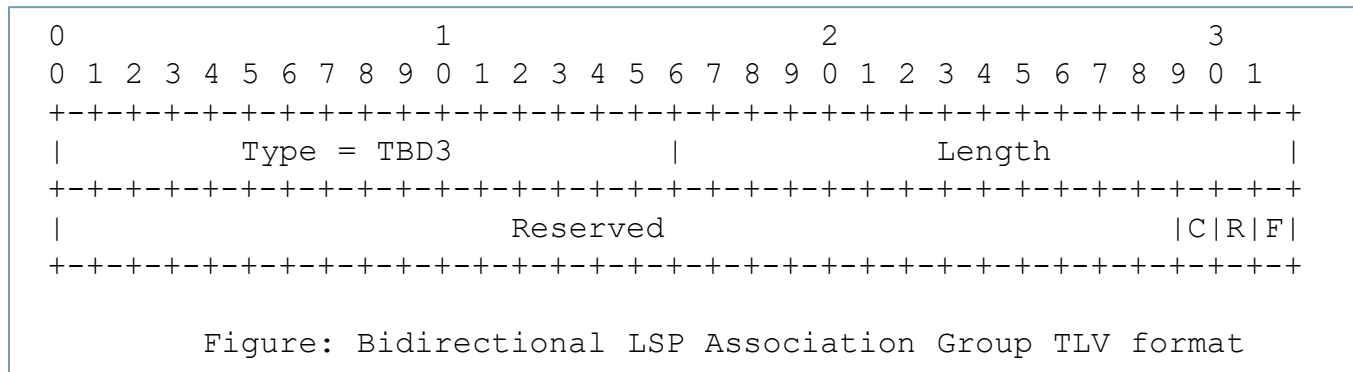

# Double-sided Associated Bidirectional LSP

# PCEP Association Object

- Association Type (TBD1) = Single-sided Bidirectional LSP Association Group
- Association Type (TBD2) = Double-sided Bidirectional LSP Association Group
- The Association ID, Association Source, Global Association Source and Extended Association ID in the Association Object of the bidirectional LSPs are populated using the procedures defined in [RFC7551].
- These Association Types are operator-configured associations.
  - Operator-configured Association Range TLV (Type 29) SHOULD NOT be sent, so that the entire range of association ID can be used.

# Bidirectional LSP Association Group TLV

- F (Forward LSP, 1 bit)
  - Indicates whether the LSP associated is the forward LSP of the bidirectional LSP.
- R (Reverse LSP, 1 bit)
  - Indicates whether the LSP associated is the reverse LSP of the bidirectional LSP.
- C (Co-routed LSP, 1 bit)
  - Indicates whether the associated bidirectional LSP is co-routed.

# Error Handling (PCErr Error-Type 26 - Association Error)

1. Both forward and reverse LSPs MUST belong to the same bidirectional TE tunnel [RFC3209].
  - Error-Value = Bidirectional LSP Association - Tunnel mismatch
2. LSP (forward or reverse) cannot be part of more than one Bidirectional LSP Association Group.
  - Error-Value = Bidirectional LSP Association - Group Mismatch
3. If a PCEP speaker receives a different PST value for Bidirectional LSP association group and it does not support.
  - Error-Value = Bidirectional LSP Association - Path Setup Type Not Supported

# Next Steps

- Welcome your review comments and suggestions
- Already in the WG LC Queue

Thank you.
